CAMBRIDGE

STEELFAB

& ENGINEERS LTD

CAPABILITY STATEMENT

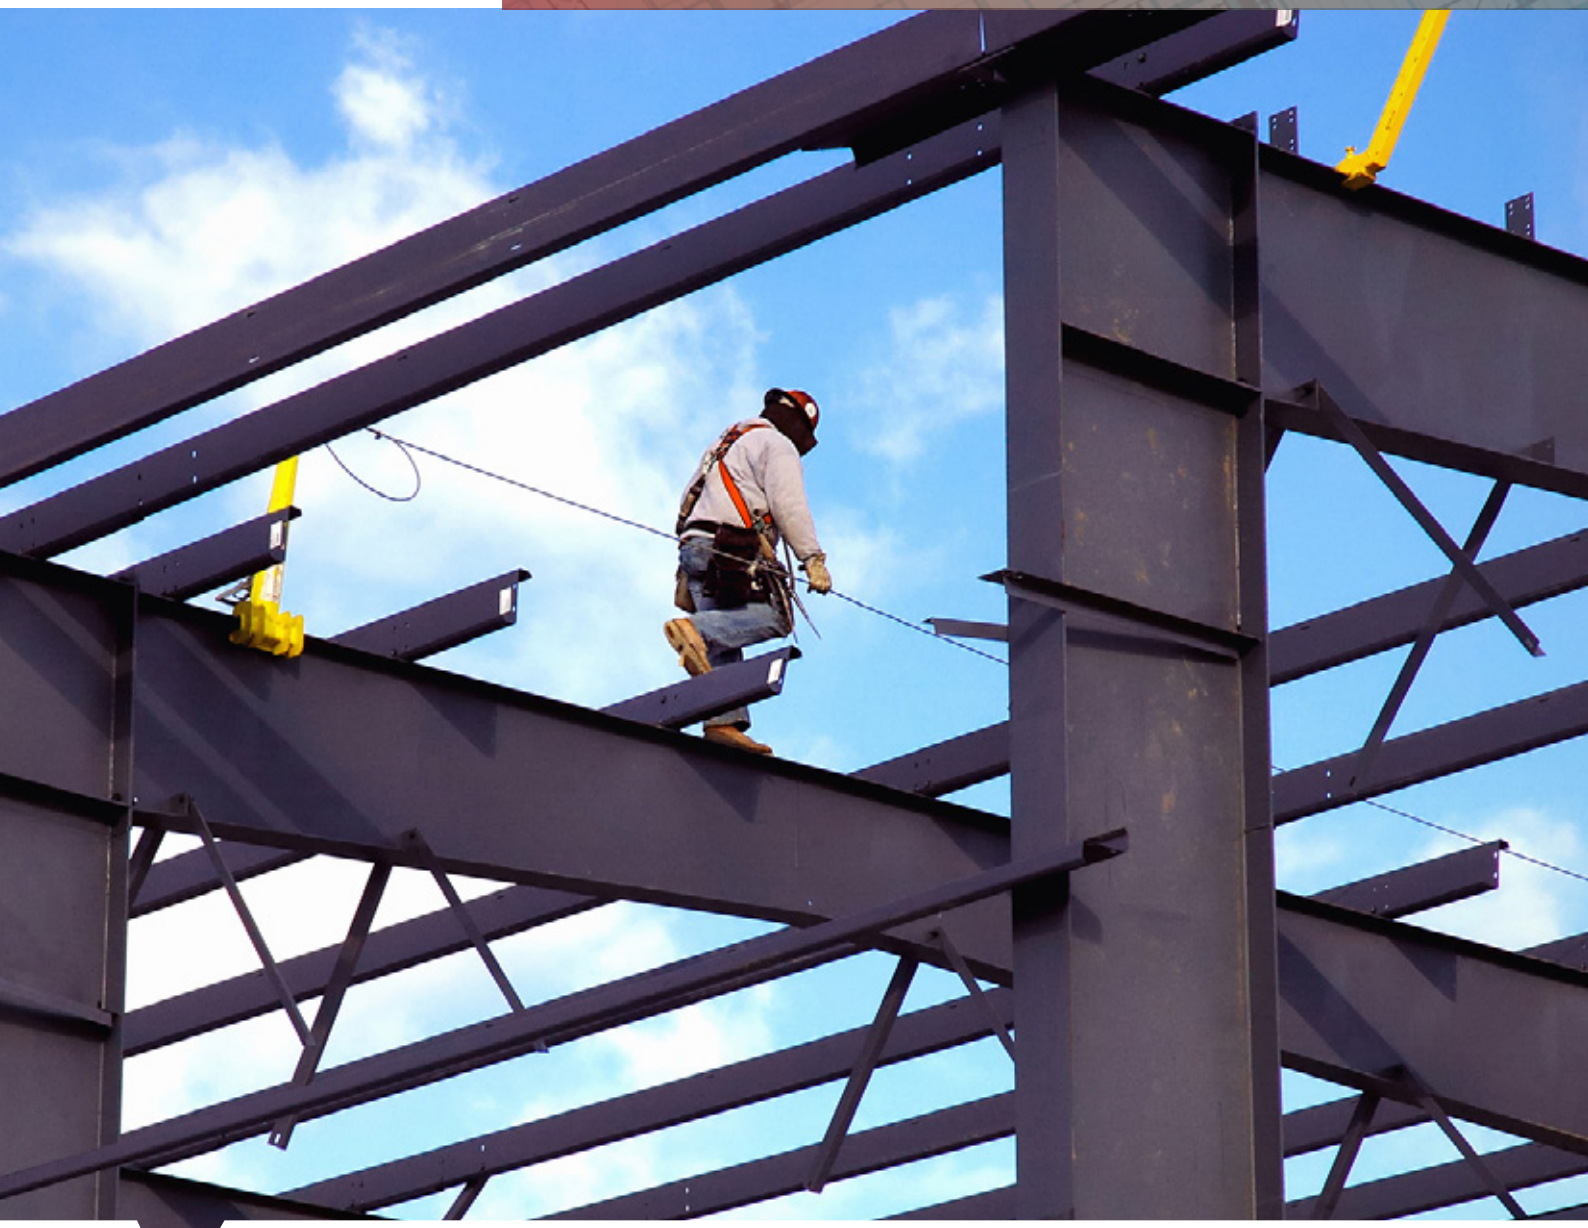
CORE COMPETENCIES

Cambridge Steel Fabricators the number one Steel Fabricator company in Cambridge. We specialise in all aspects of Structural Steel Fabrication and Installation. With a team of experienced Tradesman and Industry Professionals, 3D modeling of Construction drawings along with a fleet of fully equipped site vehicles we can tackle a wide range of structural steel construction work.

"I WOULD LIKE TO EXTEND MY THANKS TO ALL INVOLVED WITH THE CONTRACT AND TRUST YOU WILL ALL PAT YOURSELVES ON THE BACK FOR A JOB WELL DONE... THE COMMENTS WE HAVE RECEIVED TO DATE ALL POINT TO A QUALITY PROJECT/ BUILDING BEING DELIVERED WHICH THE UNIVERSITY ARE VERY IMPRESSED WITH."

DIFFERENTIATORS

Our trusted service beats the Structural Engineering market by focusing on flexibility, accessibility, and convenience delivering a hassle free experience. Our team are genuinely committed to caring and delivering on our customers' unique requirements making Cambridge Steel Fabricators leaders in our industry.



PAST PERFORMANCE

Similar projects completed in recent history include Aongatete Coolstore (156 Tonne), Normans Transport Warehouse (255 Tonne), Mitre 10 Mega Cambridge (60 Tonne), AgEssentials 50x60m Clearspan, Rainbows End Kiddies Kingdom Steltech Steel Canopy (100 Tonne), several Farmlands including Cambridge, Te Awamutu and Taihape, Carpet Mill Hamilton – Warehouse Extension, Leamington Shopping Complex which included Fresh Choice Supermarket.

QUALITY ASSURANCE / QUALITY CONTROL

Quality Assurance is becoming increasing important in the industry. Cambridge Steel Fabricators has invested in StruMis steel fabrication management information and production system which provides industry leading traceability from estimate through to construction.

Quality Control Processes are effective only if they are clearly defined and conveyed to the managers managing the work and tradesmen performing the work. Cambridge Steel Fabricators have documented procedures to cover all key internal processes including but not limited to:

- Document control
- Management of revisions and variations
- Procurement
- Material Receipt
- Fabrication
- Welding
- Protective Coatings
- Site Preparation
- Site Completion

We track and report on non-conformance to our processes and review these weekly at our management team meeting.

COMPANY DATA

Our core team consists of 17 full time employees in the operations area and five employees in the support area. Our operations team utilises qualified Trade sub-contractors as required to meet customer requirements.

We continue to service the North Island from our Cambridge based workshop.
